

# Frozen Drink Machine

**\*\*\* FOR SAFETY REASONS, CHILDREN SHOULD NOT OPERATE THIS MACHINE. \*\*\***

IMPORTANT: This machine is designed for indoor use. If using outdoors, keep out of direct sunlight. The higher the temperature and humidity, the more difficult it is for the mix to freeze. For best results and for a timely mix freeze, use indoors. CONTENTS WILL NOT FREEZE OUTSIDE IF TEMPERATURE IS ABOVE 80 DEGREES.

## Operation instructions

1. Carefully place unit upright on stable level surface. Do not lay unit on its back or side as damage to the compressor may occur
2. Connect unit to the power supply (110 v, 15 amp grounded circuit)  
NOTE: BEFORE FILLING, ENSURE DISPENSING BOWL IS LOCKED IN PLACE AND SEALED.  
(Hint: If you are unsure if the bowl is properly seated, you can test it by pouring in a little water first.)
3. First, empty one gallon of slush juice into one of the 5 gallon containers provided. Pour in 4 gallons of water until it reaches the number 5 mark. Shake the 5 gallon container to mix well. Remove lid off of one of the two bowls. Pour the slush mix into the top of the bowl up to the "max" line. **Do not overfill the tank.** Repeat all steps for the second bowl. You will still have a good portion left over each of the 5 gallon containers. Refill when the mix gets low.
4. If adding alcohol to slush mix, exchange with one gallon of water with 1 gallon of liquor.
5. To operate, press main power switch (lightning bolt) and agitator switch (circle arrow) to ON position. NOTE: the agitator switch must be to ON position before setting to liquid or slush mode.
6. For slush, press the cooler switch to bottom position (snow flake).
7. For liquid press the cooler switch to up position (rain drops).
8. For thick slush, turn the white plastic dial on the back of each bowl to 3 to 4. For a more liquid slush, turn the white plastic dial to 1.5 to 2.
9. Allow 1 to 1.5 hours for the product to freeze. If you are outside allow additional time.  
NOTE: CONTENTS WILL NOT FREEZE OUTSIDE IF TEMPERATURE IS ABOVE 80 DEGREES.

**Tip: This unit can be used to dispense sodas, Gatorade, apple cider, etc.**

## Cleanup Instructions

NOTE: No disassembly required.

1. Turn unit off and unplug from power source.
2. Drain machine of any leftover product.
3. Run cold water through unit and drain.
